

Dear Friends,

Our organization turns 20 years old.

Many of us are part of this world organization which has maintained an incessant fight against media manipulation, capitalist siege and attempts to divert us from our path.

Talks, meetings, studies, trips and fraternity among our members has been what has characterized us the most.

The study of the Korean language, its culture, the Juche idea and Songun as well as its history, the work for the reunification and dissemination of the Korean reality in our respective societies is the mission that we have been empowered as members of this association.

Korean people knows about our existence thanks to the support given by the great leaders to the initiative proposed by our President Alejandro Cao de Benós, who with so much effort and altruism, honor and courage put his dream of being a soldier of the Korean People's Army aside to create our association.

The KFA has become internationally renown due to its labor and that gives the homeland of Juche an essential support.

Let's be worth of being satellites of the Sun, let's honor the trust given by the Korean people.

Thanks to our President!

Thanks to all the members for making this possible!

Long live the great Paektu heroes!

Long Live Marshal Kim Jong Un!

Jaime Gómez Arjona  
Spanish KFA Organization Secretary
