

Juche is an invincible and indestructible teaching!

With great enthusiasm, we celebrate the 110th anniversary of the birth of Comrade Kim Il Sung, the founder of the Great Workers' Party of Korea and the great leader of the peoples of Korea and the world.

Those of us who fight for Socialism and our ultimate victory, Communism, find Comrade Kim Il Sung so close to ourselves that our hearts overflow with respect and love whenever we have to write a text about him.

Because Comrade Kim Il Sung is Communism. It is the banner of struggle against all kinds of counter-revolutionary and modern-revisionist scoundrels, it is faith in the working class and the people.

Comrade Kim Il Sung lives in every great success of the DPRK, which announced the beginning of the Juche era to the peoples of the world and marched on the path of communism with the Korean Revolution, whose value is too great for us to describe.

Modern-revisionists of all kinds fighting against Juche Korea, like the exploiters, 'smash and destroy!' They use tactics. They are striving tirelessly to separate Juche from Socialism, the Workers' Party of Korea from the International Communist Movement, to smash the anti-imperialist front. The revisionists strive to corrupt Communism and separate it from the Juche, thereby eliminating Socialism as a science. Their aim is to turn the wheel of history back, to deprive the working class and all toilers of the advantages of Communist doctrine. According to them, Socialism is a kind of humanism, while Marx, who transformed Socialism into science, was an English humanist. According to them, Marx escaped from people in order to write his "method of thought", took refuge in the lap of nature and spent his life in the ocean of abstract ideas. To interpret Marx and Communism in this way is to reject it. Kautsky and Bernstein, the forerunners of the modern-revisionists, had achieved considerable success in corrupting Marx's teaching. The modern-revisionists want to repeat the same "achievements". However, they seem to forget that the "success" achieved by their predecessors was a short-lived "success". All the efforts of the old revisionists have been wiped out by the Communists, and the efforts of the new, modern-revisionism will be wiped out by the communists who believe in Juche.

The teaching of Comrade Kim Il Sung, whose birthday we celebrate today, has been developed and applied to reality, drawing on the experience of Marx and other leaders. Blended with the genius of Comrade Kim Il Sung and further developed by Comrade Kim Jong Il, this teaching is a solid, insurmountable obstacle in the way of all supporters of revisionism and opportunism. Revisionists are faced with a question that drives them crazy: "How do we alienate the peoples of the world from Korea?" Yeah, how will they do it? This is really hard work. Because Korea is the only country where socialism has achieved success today. Korea is the guiding pole star of all the peoples of the world.

As we celebrate Comrade Kim Il Sung's 110th birthday, we say to all kinds of modern-revisionists: You may think that the actions you take hand in hand with the imperialists do temporary damage to Korea's reputation. But your efforts to separate Korea and Juche from the World Communist Movement will yield no results. Because life and the path followed by the peoples of the world have condemned your efforts to failure. Juche is the truth, Communism itself. Juche is an invincible and indestructible teaching.

All his life, Comrade Kim Il Sung has hovered the banner of Communism and Juche. We communists of Turkey will continue to be faithful to his eternal teaching and defend Socialist Korea on the basis of proletarian internationalism.
