

On The Occasion of 110th Anniversary of Day of The Sun

Dear Comrades and Friends,

Juche-Songun Revolutionary Greetings from Singapore.

On this day, The Glorious Sun of Korea was born. Rising during one of the turbulent times in Korean history under foreign occupation. The Sun of Korea brought hope and warmth to The Korean people. Since young, President Kim IL Sung has devoted his heart, mind, soul, and strength to The People. Taking part in the anti-imperialist struggle from a young age, President Kim IL Sung won the hearts and minds of many people. Leading the struggle and the front line and choosing not to collaborate with the traitors or occupying forces he has won the respect and admiration of many from home and abroad.

After the end of The Second World War Korea was divided into two, President Kim IL Sung continued the struggle of The Korean People to form an independent peace loving socialist state. Yet, again, The DPRK was invaded by the corrupt regime of South Korea and America under the false pretext of being provoked by The DPRK. History has proven itself that the war was not started by The DPRK but by the corrupt regime of America and South Korea. The DPRK emerged victorious during The Fatherland Liberation War.

After the war, President Kim IL Sung devoted his life to rebuild The DPRK. He rebuilt and created a thriving, independent, and free Socialist state within a single generation. He devoted his entire life to lead, guide, and love the people as though they were his own family till his demise. He will continue to live in our hearts and mind.
