

First of all, we salute all organizations and comrades presents here.

The delegation of the Korean Friendship Association in Portugal together with the Juche Idea Study Center of Portugal speaks on the anniversary of the birth of the leader comrade Kim il Sung, following the speech:

The esteemed birth date of comrade leader Kim il Sung is a date celebrated all over the world, from North to South, from East to West, revolutionaries and free workers hold high esteem for the liberating leader of the Korean people and his valiant and eternal contributions to the international revolutionary movement.

On this date, the comrade would have been 110 years old if he were still with us, even though his body has already left us, his revolutionary spirit is still very much alive in our hearts, as well as his eternal legacy, his affection and admiration for the Korean people, served the Korean people until their last day of life and dedicated their body and soul to overcome all the challenges that the imperialists imposed on them.

President Kim Il Sung was a unique leader who cannot be compared to any other, as he was someone who set out on the revolutionary path in his adolescence and died at an advanced age drafting important documents for the reunification of the country.

With the Juche idea, conceived by him, he led to continuous victories for both the Korean revolution and socialist construction, by relying and relying only on Korean forces and, in the light of this idea, building the socialist state as an apparatus to fully realize the independence of the popular masses, emancipated as owners of society and its teachers.

At the head of the socialist country, Kim Il Sung built a true country of the people by serving with total dedication, following his ideal of Iminwichion (considering the people as heaven),

traveling all over the country wherever the people were, to hear them. and to discuss with him both domestic and national affairs. By the end of his life, he visited 20,600 units across the country, constituting a distance of approximately 1,445,000-ri (Korean unit, 1 ri equals 0.4 km).

For his countless achievements, for the Korean people and for the promotion of independence and peace in the world, he is exalted as the Sun of Juche and of humanity and was eternalized as the eternal Leader of the Korean people and the Party of Labor of Korea, endlessly continuing his indelible merits of life and immortal contributions to the advancement of the socialist cause.

Long live the great Leader comrade Kim Il Sung!

위대한 수령 김일성동지 만세!

Happy Sun Day!

☐☐☐ 축하합니다!
