

“75th Anniversary of the invincible Korean People’s Army”

The Korean People’s Army, born on February 8th 1948, is an army trained in the most difficult conditions of history under the pressure of the most cruel imperialism.

President **Kim Il Sung** with his great wisdom and strategy, published many works and gave hundreds of instructions regarding the construction of an army that will become not only the shield of the nation, but the greatest and most organized construction power to raise Korea from the ashes of occupation and war.

In the DPRK, the army is one together with the people. The soldiers always think to dedicate their youth and devote themselves to serve the community, and the neighbours always love the soldiers. This is a love in both directions that is unthinkable to see in other countries of the world, where the army is seen as something violent or even a force of citizens’ repression.

The victories of the KPA have two special medals that will shine forever in our memories, one is the victory over the US imperialism and its 16 lackey nations. Another one is when the nuclear army was established.

The victory in the Fatherland’s Liberation War destroyed the face of the arrogant USA, losing its first overseas war, and the building of a nuclear power represented that nobody will escape retaliation in case of invasion. The power and amount of weapons developed by the Korean People’s Army is comparable to that of a nation 10 times bigger even having 100 smaller resources.

But the army without a proper chain of command and leadership can never be victorious, so one key element of success has been having the most excellent and brave Supreme Commanders in the different challenges of history. Generalissimo **Kim Jong Il** and Marshal **Kim Jong Un**, loyal followers of the Juche Idea and Songun Policy, developed the army equipping it with the latest technology and firepower, converting machine guns into cannons, and cannons into missile launchers.

In People’s Korea one will regularly hear that there is no difference between the three Leaders in the country, and only by knowing well the Korean people, its history and leaders’ instructions, one can fully realize that President **Kim Il Sung** and Generalissimo **Kim Jong Il** are immortal, and that our Marshal **Kim Jong Un** give the greatest honour to all fallen soldiers and veterans, guiding the invincible Korean People’s Army to the victory against the enemies and the construction of a human paradise.

Long live Marshal **Kim Jong Un**!

President **Kim Il Sung** and Generalissimo **Kim Jong Il** will always be with us!

Long live the invincible Korean People’s Army!

Alejandro Cao de Benos

President of the KFA
