

Dear friends and comrades in Korea.

I am writing to support and share the great joy of the 70th anniversary of the Victory in the Fatherland Liberation War, where U.S. imperialism had to kneel down for the first time in the world and acknowledge its military defeat.

American imperialism tried to trample upon the great honor and pride of a people who have always defended themselves against external aggression. The imperialist nature of dominating and subjugating militarily, economically and politically was attempted to be realized on the Korean peninsula after another imperialism, the Japanese imperialism, was also defeated, leading to a series of successive imperialist attacks.

The U.S. imperialists believed that this was just another people who could not defend themselves and would be easy to dominate, and through mass terror and mass murder they wanted to subdue the nation that had resisted foreign invasions for centuries.

The organization and unity that the Korean people achieved thanks to the great Eternal Chairman Kim Il Sung was an event that made it possible to engage in battle and organize the guerrilla resistance and organized struggle in a regular army that made use of popular communist ideology and values that were far from the fascist and imperialist ideology of the U.S. army.

Living underground, fighting almost without fortifications, being the victim of daily bombardments that left no stone unturned, raising new generations in difficult conditions, training thousands of soldiers, organizing work at times when life above ground could lead to almost certain death, all this could be endured and overcome thanks to the great will and faith of the Korean people in the cause of national liberation and the construction of socialism under the leadership of the Workers' Party of Korea.

under the leadership of the Workers' Party of Korea.

Its ability to keep the popular masses in a state of mind and fight as well as magnify the unity between: Leader-mass-Party made the Korean feat sit at the negotiating table to sign and recognize before the world the impossibility of conquering all Korea. However, we will never forgive the invaders and occupiers of the South of the country or their lackeys for treason against the homeland and subservience to foreign powers.

Once again we remember the heroism, sacrifice and patriotism of the Korean people and their leaders who are an unparalleled example throughout the world.

For the total reunification of the homeland!

Commander Kim Jong Un, always with you and the Korean people!

Death to the invader!! Long live the Socialist homeland!

Jaime Gomez Arjona
